

Leverage Qscreen™

Enhance the onsite fingerstick experience with Qscreen

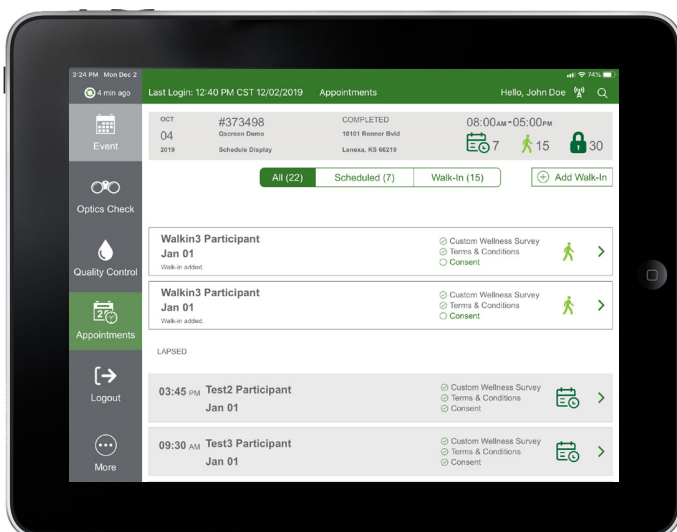

Qscreen™ is the iPad® application from Quest Diagnostics that improves event quality by limiting event paperwork, reducing processing time, and enabling real-time upload of results to the participant record.

At fingerstick events with Qscreen, less time is spent locating participant data and filling out forms. Qscreen eliminates the need for paper requisitions for scheduled appointments and walk-ins. Additionally, with Qscreen scheduling can continue to the day prior to the event.

How it works

- Providers download the schedule of appointments the day prior to the event.
- Optics checks and other calibration quality controls are completed on the iPad before any participants can be screened.
- Data entry includes a participant review and verification process.
- Data is uploaded to the participant record within a few hours.
- Data is sent to authorized parties within 24 hours.

The benefits of Qscreen

Eco-friendly!

Minimal paperwork is needed at onsite fingerstick events. Participants who scheduled online prior to the event simply check-in on the iPad, verify their information, and complete their screening. All consent, questionnaires, and requisitions are also filled out through the iPad application.

Allows for more a more flexible scheduling period.

Qscreen eliminates the need for cutoff deadlines of a week or more for appointment scheduling. Screening participants can access an online portal by computer or mobile phone right up to the day before the event. Participants can easily locate open timeslots and schedule their own appointments.

Helps keep participant information safe.

There are no paper requisitions or other paper forms with Qscreen, so personal information like address and date of birth, are more secure.

Streamlines the participant experience.

Qscreen allows the participant to focus on signing in, completing a screening, obtaining results, and getting back to work. With the option to schedule online or with a mobile device right up until the event, the walk-in process is smoother and more intuitive. Qscreen also links with the participant portal, and automatically sends the participant's results to his/her online account via secure transfer within 24 hours.
